🐙 github.com/TaufiqSyed

Synopsis

Software Engineer with hands-on experience building and maintaining production-grade full-stack applications. Strong focus on backend development (Node.js, Django), system design, CI/CD, and cloud-based architectures.

Product-driven engineer who values clean, maintainable code, collaborative Agile development, and loves art, bringing creativity and design thinking into every project.

Awards

Secured 2nd in Noon Cake Product Management Hackathon | 2025 ✓

Secured 2nd in SoftwareAG GITEX Future Disruptors Competition | 2023 ✓

Placed 1st in AUS Programming Contest | 2022

Secured 2nd in Abu Dhabi University STEM Programming Contest | 2022

Secured 2nd in "AUS Tech-centric Hackathon" | 2022

Participated in Gulf Programming Contest (5th out of 30 teams) | 2022

Skills

Backend Development: Node.js, Django, Docker, Linux, Bash, SQL, MongoDB, NoSQL, WebSockets

Large Language Models: Hugging Face, LangChain, Fine-tuning, NLP, Transformers

Source Control: Git, GitHub, GitLab, CI/CD

Front-end Development: React, Next.js, Angular, Flutter, React Native, HTML, CSS

UX/UI: User stories, Wireframing, Mock-ups, Figma

Artificial Intelligence: TensorFlow, PyTorch, Pandas, PySpark, NumPy, Sklearn, Gradient Boosting

AWS Certified Cloud Practitioner ✓

Coursera Deep Learning Specialization ✓

Languages

Python • C++ • TypeScript • JavaScript • Java • MATLAB • R • Dart • Flutter

Soft Skills

Leadership • Creativity • Divergent thinking • Initiative • Communication • Adaptability

Education

American University of Sharjah

BS Computer Science

09/2021 – 06/2025

Courses: Databases, Data Mining, Discrete Mathematics, Stochastic Systems

Professional Experience

Full-Stack Developer

Belsons Technologies (Land Sterling Group) ✓

08/2025 – Present | Dubai, UAE

- Developed and maintained backend services with Django/DRF and RESTful APIs for an ERP system
- Implemented role-based access control (RBAC) across modules
- Added automated tests to improve reliability and maintainability
- Worked in containerized environments and CI/CD workflows

Software Engineering Intern

Belsons Technologies (Land Sterling Group) ✓

07/2024 – 08/2024 | Dubai, UAE

- Built AI-assisted property analysis reports by integrating GPT-4 outputs with real market data
- Collaborated with engineers and stakeholders to translate data insights into product-facing reports

Software Engineering Intern

ILM UX Ltd. ✓

06/2022 – 09/2022 | Mumbai, India

- Contributed automated tests as part of a CI/CD pipeline to improve deployment quality
- Developed a real-time internal chat application using WebSockets

Projects

Full-Stack Reddit Clone ✓

Personal

- Built a full-stack web application using React, Next.js, Node.js, and PostgreSQL
- Implemented JWT-based authentication and REST APIs
- Focused on clean architecture, scalability, and maintainable code

Attendance & Event App

AUS College of Engineering

- Designed backend APIs using Node.js to support mobile clients
- Implemented offline caching and Cloud Messaging notification workflows

Generation of High-Level Music Structures

American University of Sharjah - COE 476

Processed music dataset into music-prompt pairs with extracted structural information, and finetuned the MusicGen transformer using a LoRA adaptor. [CLAP LAION FAD: 0.9959; Overall Quality: 70.48/100]

Research

Published Research (Co-Authorship)

- A Smartphone-Based Application for Crop Irrigation Estimation in Selected South and Southeast Asia Countries – MDPI, 2026 ✓
- Generative AI for Early Grade Story Generation Using a Self-Reflective Approach – IEEE, 2025 ✓
- Tailored Tales: Enhancing Children's Reading Comprehension with Preference-Tuned Automatic Story Generation – IEEE, 2025 ✓
- Can GPT-4 Aid in Detecting Ambiguities, Inconsistencies, and Incompleteness in Requirements Analysis? A Comprehensive Case Study – IEEE Access, 2024 ✓
- Once Upon a GPT-4: Enhancing Diversity in Automated Reading Comprehension Story Generation with Classic Tales – IEEE, 2024 ✓

Extracurriculars

President | Open Source Club ✓

American University of Sharjah | 2023-2024

Led and delivered hands-on workshops on Node.js, React, Git, and software engineering best practices

Activities Coordinator | Tech-Entrepreneurship Club ✓

American University of Sharjah | 2023 - 2024

Led a 5-part workshop series on cross-platform mobile development and backend integration for beginners
